

OmniPORT™

USB Flash Drive Cloning Adapter

Configurations

- SATA connector allows direct connection to the following Logicube products: Echo Plus™, Sonix®, OmniClone® 10Xi/5Xi/2Xi, Forensic Talon®.
- The OmniPort™ can connect to the following Logicube products with a Logicube Serial-ATA Adapter: Forensic MD5®.
- The OmniPort comes in two flavors: Write Protected (Read-Only) and non-Write Protected (allows reads and writes to the attached USB drives).
- The OmniPort can be connected directly to a PC running Windows® 98/ME/2000/XP/2003 or DOS*

Compatibility

The Logicube OmniPort is compatible with many different USB drives including the following:

- Portable USB Flash drives (i.e. "Thumb Drives", "Pen Drives" and similar devices).
- Flash Memory Cards (CF, MMC, SD, xD, etc.) with a USB Card reader.
- 2.5" and 3.5" External USB drives up to 137GB in size.

Features

- The OmniPort allows data cloning to or from the attached USB drive by the aforementioned HDD duplication products.
- The OmniPort can be connected directly to a PC's motherboard and booted as an IDE device.
- The OmniPort allows data duplication of USB Drives at non-UDMA speeds.

**Only the Write-Protected OmniPort has DOS connection capability.*
