

OmniWIPE™

The **OmniWIPE™** from **Logicube** is the ideal way to quickly wipe drives prior to re-using them. The powerful OmniWIPE sanitizes multiple IDE, EIDE, UDMA and SATA drives simultaneously at up to 2.3 GB/min. This 3-target system handles different makes, models, and sizes, providing wipes (erasures) that conform up to Department of Defense Specifications (DoD-M5220). Best of all, the OmniWIPE provides a truly cost-effective solution, cutting your erasure cost-per-drive by more than 33%. For all your drive-wiping needs, choose Logicube — #1 in dependability and innovation.

Configurations

- IDE, EIDE and UDMA drives can be connected directly to the OmniWIPE.
- SATA drives can be connected with the optional Logicube Serial-ATA adapter.
- 2.5", 1.8" and CF drives can be connected with optional Logicube adapters.
- OmniWIPE can wipe up to three drives simultaneously.

Features

- Wipes most IDE, EIDE, UDMA and SATA drives.
- Data erasure rates up to 2.3 GB/min.
- Drive positions 1, 2 and 3 can be of different size, make and model.
- Will provide Department of Defense (DoD) specification data wiping.
- Also capable of performing a quick one-pass wipe and high-speed Security Erase.
